

VARIOUS DEVICES

In addition to POWERFOGGERS, PULSFOGGERS and HALOFOGGERS. We also offer various other foggers and hygiene equipment. Usable in various sectors.

HEAWAT

Rinse your water tubing without chemicals. The Heawat gets connected to your piping system and removes o.a. biofilm through intervalled powerful water & air pulses through the tubing.

Tubing up to 1" wide and 500 meter length.

SYNOFOG

The Synofog is specially designed for fogging sprout inhibitors. Due to its innovative design of the heating chamber and fluid injection, the Synofog converts the used energy to a highly efficient fog capacity.

10 - 30 litres/hour 1 µm.

FVX-SPRAYER

The FVX-Sprayer is a vaccination sprayer, the perfect tool for rapid vaccination. Portable, lightweight and cordless. Droplets are electrostatically charged, creating a compact spray pattern.

40 - 120 µm. Portable

BACKPACK SPRAYER

The Maruyama MSB15LiDX delivers, apart from the comfort and ease of use, better results. The electrical pump provides a constant pressure, making the droplet size uniform throughout the spraying application.

100 - 120 µm. 15 l Portable

Battery charged

COLDFOGGING

The driest foggers for the best results. These devices can fog disinfectants or other additives to provide a complete object or surface treatment.

CART DISINFECTION STATION

The Cart Disinfection Station, is a automated disinfection lock chamber which prevents cross-contamination on picking carts and harvesting crates. By disinfecting with dry fog, all viruses, bacteria and fungi are destroyed.

1 chain of picking carts per 2 minutes.

TRUCK DISINFECTION UNIT

The Truck Disinfection Unit is an integrated electrical ULV fogging system for disinfecting trailers with the push of a button. The nozzle uses the available compressed air to create a dry fog inside of the trailer. It can be used while driving. **Also available: Wheel Disinfection Unit.**

40 m³ can be fogged in 10 minutes

COLDFOgger

The electrical ULV coldfogger system is specially developed for fogging disinfectants or other additives to provide a complete object or surface treatment. This kind of fog keeps areas dry, but they do get treated by the added agent.

5 - 10 µm. Fixed installation

FOGGER CATALOGUE

POWERFOGGER

The Powerfogger series features a large amount of automation. You only have to put it into the right spot, press the button, and the machine does all the rest!

POWERFOGGER 100

The powerhouse in the Powerfogger brand. The proven technique of a side channel blower is combined with a powerful fan, to make fine aerosols that are pushed well over 100 meters. It's fully automatic and makes for an easy and quick fog treatment without any interruptions.

40 l/h 150 m 100 l

POWERFOGGER 60

The versatile and easy to use electrical ULV fogger. With its powerful side channel blower the Powerfogger 60 is able to power one or two nozzles. This makes the Powerfogger 60 a good match for rooms of 1000 up to 9000 m³.

35 l/h 80 m 60 l

POWERFOGGER TB60

The Powerfogger TB60 Double combines big fog capacity with quality droplet size. This electrical ULV fogger can treat 2 hectares in 2 hours, giving the complete greenhouse a uniform fog with great results.

30 l/h 2x50 m 60 l

POWERFOGGER V60/P60

Specially designed for fogging pest control, probiotics or disinfectants in pig stables. The side channel blower on the Powerfogger is powerful enough to spread the aerosols throughout multiple compartments at once. Also available for the potato industry

20 l/h 30 m 60 l

TURBOFOGGER

The versatile fogger. It is carryable and works on a single 220 V power plug. So you can also take it into offices or any kind of tight areas. Its stainless steel casing, 1400 W engine and flexible nozzle makes it a top choice for daily professional users.

1-20 l/h 6 l Portable (carry)

PULSFOG

The Pulsfog series consist of powerful thermic foggers. These machines can fog a lot of liters per hour. They are especially useful for large spaces and for users who want to get the job done quickly.

K40

With a capacity between 60 (crop protection) and 120 (disinfection) liters per hour. This means it can fog large areas in a very short time, throwing the fog over 120 meters. Put this together with 125 Horse Power and the mist becomes really fine and uniform, ensuring surfaces will get equal treatment and will stay dry.

60 - 120 l/h 120 m Mobile during fogging

K10

A popular choice for poultry farmers, crop protection and pest control. It can be employed in many different areas because of its compact size. When using the optional flame head you can even get to the deepest grooves in the floor to burn insect eggs. It is the lightest of the Pulsfogs and therefore the easiest to carry while fogging.

1-25 l/h 30 m Portable (carry)

HALOFOG

The Halofog has huge fog capacity, while maintaining a very small droplet size. Can be configured completely to your needs with a choice of tank size, number of nozzles, manual or automatic controls.

HALOFOG

The Halofog is suited for fogging temperature sensitive crop protection solutions as well as strongly corrosive disinfectants. Due to the use of compressed air, the Halofog is very reliable and maintenance friendly.

40-400 l/h 150+ m

HALOFOG P9

The tried and true Halofog technology for the potato industry. The idea: use the energy of existing compressed air systems to convert a liquid into a fine mist via a nozzle. Expandable as the compressed air capacity is sufficient.

20-60 l/h 15+ m
